Research studies have demonstrated repeatedly that a strong foundation in the first language and a carefully planned process of bridging to the new language is an important factor in minority language learners’ success in education.

Education is the most powerful Weapon Which you can use to change the World. - Nelson Mandela
Mother tongue based bilingual education means starting with the learner’s knowledge and experiences; providing the child with a foundation in their first language and building a second language on this. Oral, reading, writing and thinking skills are developed in the first language, while teaching second language as a subject. Exposure to second language gradually increases, without sacrificing children’s literacy and cognition in the first language.
